Summer Pack Trip Gear – Pioneer Outfitters

Packing: All of your gear should be packed in sturdy duffel bags, preferably water proof. You will want a small pack for the gear you will need each day. Example; day pack, camera, water bottle and rain gear. **Please limit your gear to 40 pounds. Packers have the option to eliminate any unnecessary gear.** Your possessions will usually arrive unharmed if you adequately pad any **breakables**. Please tell our packers which bags contain any breakables before they start packing. Your sleeping bag can be packed in its stuff sack and mattress pads should be rolled and strapped or tied. Fishing poles should be protected in hard tube cases. We recommend labeling all gear with your name or initials. Remember to purchase your fishing license before you are packed in, you can do this locally.

Clothing: Plan to dress in lightweight layers. It can be chilly in the mornings and get hot as the day goes on. You need to be able to peel off layers. Clothing should be comfortably baggy to allow freedom of movement when layering.

Suggested Items

Sleeping Bags and Pads: We recommend a bag filled with a good quality synthetic insulation rated to at least **10 degrees**. Often, even during the summer, temperatures can drop down to freezing. Down, sleeping bags are not recommended; if wet they will not keep you warm and they are very hard to dry out. Mattress pads are a must. Most blowup inflatable mattresses do not work and they are easily punctured. A good choice is “Therm-a-Rest”. . For added warmth while sleeping, long johns and a stocking cap can be helpful. We rent bags and pads for \$35 per person/trip.

Footwear: Bring sturdy hiking boots which have been well broken-in if you plan on hiking much. Riding boots with a well-defined heel are safer and usually more comfortable when riding. Wool socks with 100% cotton liners improve foot comfort and help prevent blisters. Tennis shoes or hard soled slip-ons are great for camp wear. Also, bring “moleskin” if you are prone to blisters.

Rain Gear: Rain Gear is a Must! Bring good quality pants and jacket or poncho. They must fit over all layered clothing. Cheap plastic will tear easily.

Cameras: and other equipment should have padded and water resistant cases. We recommend carrying your camera with you.

Daypack: for use when going on day hikes and fishing destinations where horses cannot go.

Personal Needs: Please let us know if you have any specific need when it comes to the food being served on the trip (Special Dietary Needs). If you use any antacids, decongestants, eye drops, pain relievers, sunscreen etc., we suggest you bring your own. **Please notify us of any special medical considerations i.e. diabetic, allergic to bee stings, etc**
